The Theory of Everything Intro

The Theory of Everything & The Future

Do not look to the world **to seek to know and understand the 'future'**, **look within** to the very **tabernacles of hu-man hearts**. When you look at the world, **you're looking at the past**, when you're looking within and reading the ideals God has placed there, you're getting a glimpse of the 'future'.

WE are not our own, we are the vehicles of ABSOLUTE INTELLIGENCE manifesting more and more of itself THROUGH US to fulfil its ideals, which are also, **our own truest and highest ideals**.

In the search for a Theory of Everything (ToE), Scientists need to understand that the 'theory' cannot remain a theory (even though they like to use the word 'theory' to sum up the latest 'truth'). The theory must answer, in a very real and practical way, the questions raised by FEELING, TASTE, IMAGINATION, indeed, **by all the mental, emotional, and Spiritual attributes of BEING, as well as the intellectual**.

It needs to answer the questions arising from **transcendental mental states** and other out of the body experiences. A TRUE ToE cannot **just be based on an intellectual hypothetical framework unifying existing disparate theories**, or claiming to explain the fundamental nature of reality, while it clings to an unproven and irrational premise, namely, that intelligence is the product of the brain, when those **who have memories in a number of**

incarnations, as well as those who can vacate the body and travel on other planes of consciousness, (do remote viewing, etc.) categorically disprove this.

A TRUE ToE IS NOT FOR PROFIT, not for sale. It continually illumines our comprehension of ourselves and the Uni-verse, **the One Song of Creation**.

Even the concept of 'multi-verses' and 'parallel universes' all must be accounted for in a TRUE ToE - **and there is but ONE ToE, which fulfils all these requirements: ABSOLUTE INTELLIGENCE.**

Therefore, a TRUE ToE **cannot be confined to Physics**, which, is self-limiting. Physics is impotent/inadequate in defining FEELING, TASTE, and other Soul (psychic) Phenomena.

In this series of lessons, **we're going to unpack the Theory of Everything** which answers all humanity's questions, although in doing so, each person needs to **evolve** and embody the understanding innate within our Soul consciousness, rather than limit it to their intellect.

When the **light of the Soul** shines on the intellect, the intellect becomes illumined, and an illumined intellect, from that point onwards, **always refers to the Soul-Wisdom**, our underlying Psyche-o-logical understanding and reasons for being to establish understanding/Wisdom.

Neither the ToE based on gravity, nor quantum mechanics, hold water when it comes to THE HUMAN EXPERIENCE. They treat of our existence as a **random event**, and this it appears is an agenda, best understood as the lessons unfold.

When, it is recorded that God said: "**Let us make man in our image, after our likeness**", and then a story unfolds, the details of the story encode Wisdom infolded within us, and woven throughout the Cosmos, like the signature of a tree is involved into the seed.

That story is OUR story. And, as we are 'stardust' we encapsulate all the Wisdom in existence, we are the embodiment of ABSOLUTE INTELLIGENCE, which had no 'beginning', and of which there is no end. **ABSOLUTE INTELLIGENCE** (which we can perceive) IS the ToE which incorporates **all mental phenomena** and that which is subjective and relevant, yet, often considered not to be: **FEELING**.

Join us in this latest series of lessons.

The Science of Be-Ing and Knowing

The Theory of Everything (ToE)

Lesson 2

LOVE AND LIGHT IN ALL AND THROUGH ALL!
"THE NEW WORLD COMES THROUGH US".
www.servadei.com

Lesson 2:

The Persistent Neglect of Intelligence, Emotion, and Psychic Phenomena in Existing Theories of Everything

The persistent neglect of intelligence, emotion, and psychic phenomena in existing Theories of Everything (ToEs) stems from several deeply ingrained biases in mainstream scientific thought:

1. **Materialist Reductionism** – Modern ToEs are largely developed within a framework that assumes everything can be explained in terms of fundamental particles and physical laws. This reductionist approach dismisses non-material aspects such as intelligence and emotion as mere epiphenomena (a secondary phenomenon that is a by-product of another phenomenon) of neural activity.
2. **Mathematical Formalism** – ToEs are expected to be expressed in precise mathematical language, which favors quantifiable phenomena. Intelligence, emotions, and psychic experiences are difficult to quantify, so they are often excluded from the equation. Therefore, the existing ToEs are, in fact, not complete ToEs.
3. **Empirical Constraints** – Science relies on repeatable experiments and objective measurements. Psychic phenomena and even subjective consciousness do not fit neatly into this paradigm, leading many scientists to ignore them rather than challenge the limitations of their methods.

4. **Historical Bias** – The scientific revolution and Enlightenment-era thinking sought to distance knowledge from religious and mystical traditions. As a result, anything resembling metaphysics or spiritual insight has been systematically sidelined, again resulting in incomplete ToEs.
5. **Fear of Controversy** – Researchers who attempt to integrate consciousness, psychic phenomena, or non-material intelligence into physics risk being dismissed as pseudoscientific, which discourages open exploration. However, true science and the identification of a True ToE must include these aspects.

Conclusion

A true Theory of Everything must necessarily account for intelligence, emotion, and psychic phenomena because these are not separate from the universe—they are expressions of the same fundamental reality. They are aspects of each of US. Intelligence permeates nature (as seen in self-organizing systems), emotions guide behavior at all levels of consciousness, and psychic phenomena reflect interconnectedness beyond classical notions of space and time.

A complete ToE would need to unify not just physical forces, but also the principles of consciousness—acknowledging that reality is not purely mechanical but intelligent, interconnected, and expressive at all levels.

The following lessons set the groundwork for a True ToE—ABSOLUTE INTELLIGENCE—and provide sound answers for each aspect of existence.

The Theory of Everything (ToE)

Lesson 3

LOVE AND LIGHT IN ALL AND THROUGH ALL!

"THE NEW WORLD COMES THROUGH US".

www.servadei.com

Lesson 3

A true **Theory of Everything** must recognize that **Absolute Intelligence is the foundation of existence**—not an emergent property, rather the very principle that **pours itself into and animates all things**.

- **Matter itself is not primary**—it is the condensed, structured expression of intelligence.
- **Laws of physics are not accidental**—they are the systematic outflow of intelligence organizing itself.
- **Consciousness is not an anomaly**—it is the direct experience of this intelligence within itself.

This means that a ToE must go beyond just unifying the four fundamental forces—it must **integrate intelligence as the generative force** that gives rise to both the physical and non-physical dimensions of existence. Any attempt to explain reality **without** acknowledging this **will always be incomplete**.

Conclusion

If Absolute Intelligence is the foundation of existence, then any Theory of Everything that ignores intelligence as the **generative** force remains inherently incomplete. The organization

of matter, the structure of physical laws, and the presence of consciousness all point to an underlying intelligence that permeates all things.

However, mainstream scientific approaches to the ToE often **reduce reality to mathematical abstractions**, dismissing intelligence, perception, and experience as mere byproducts. In **Lesson 4**, we will examine how this insistence on a purely mathematical framework limits the scope of scientific inquiry. We will explore why **love, imagination, feeling, and curiosity**—fundamental aspects of existence—cannot be reduced to equations, and why a **true ToE must account for both the seen and unseen dimensions of reality**.

APPLIED META-PHYSICS

The Science of Be-Ing and Knowing

Animae nostrae alas habent

The Theory of Everything (ToE)

Lesson 4

LOVE AND LIGHT IN ALL AND THROUGH ALL!

"THE NEW WORLD COMES THROUGH US".

www.servadei.com

Lesson 4

The insistence on a **purely mathematical** approach to a **Theory of Everything** reveals an **ideological bias**, not a true pursuit of understanding. When physics **cannot fully map even a single living cell** or identify its constituent parts, yet claims it is on the verge of a "complete" theory, **it exposes its own limitations**.

Love, imagination, feeling, curiosity—these are fundamental **realities**. They shape existence **as much as gravity or electromagnetism**. Yet, physics ignores them because they **cannot be reduced to equations**.

Sensory experience (taste, eyesight, touch) **is not numbers**—it is direct awareness. Science can describe wavelengths of light, yet it cannot explain the experience of seeing. A single living human cell is beyond full comprehension. It contains molecular machinery, intelligence, and self-repair mechanisms that no human has replicated from scratch.

Fig. 1:

Human Cell (Source: search engine).

When people persist in using methods that **they know are inadequate**, it means they are **either blind to their own limitations or they have an agenda**—often to maintain control over the narrative of what constitutes "acceptable" knowledge.

A real ToE must begin with the understanding that intelligence, perception, and life itself are the **foundational realities**—not accidental byproducts of the 'evolution' matter, when any form of evolution is impossible without intelligence.

Evolution requires acknowledgement of surroundings.

Decision making.

A design to make sure the evolved part works.

A reason to change in the first place.

Conclusion

A purely mathematical approach to a Theory of Everything fails to capture the full spectrum of reality because it excludes intelligence, perception, and life itself from its framework. True understanding cannot arise from equations alone; it must account for **the organizing principle behind all things—Absolute Intelligence**.

In **Lesson 5**, we will expand on this by exploring how Absolute Intelligence is not just present in life—it **is life itself**. We will examine how intelligence is woven into the very fabric of existence, animating all forms and giving order to the universe. Rather than treating intelligence as a secondary phenomenon, we will see that it is the **guiding principle that directs and sustains all creation**.

The Theory of Everything (ToE)

Lesson 5

LOVE AND LIGHT IN ALL AND THROUGH ALL!

"THE NEW WORLD COMES THROUGH US".

www.servadei.com

Lesson 5:

ABSOLUTE INTELLIGENCE is OMNIPRESENT LIFE.

This is the principle animating us all. In the allegory of 'Adam and Eve', 'Eve' is called "the mother of all the living" and represents the 'matter' side of creation (Mother is 'mater').

While LIFE is an omnipresent principle, **EVERYTHING** animated NEEDS a body. These bodies are comprised of the smallest particles, waves, light, energy, etc.

Absolute Intelligence is the guiding principle that gives 'strings', 'quarks' 'particles' 'waves' 'gravity' 'strong force', weak force', 'electromagnetism' and all the other aspects of creation ORDER in Life, meaning and direction.

Without intelligence, the universe would be nothing except a chaotic jumble of energy and matter—random interactions with no coherence, no order, no life.

Intelligence is ESSENTIAL to shape and determine the properties of each of these, and since each reveals some intelligence, ABSOLUTE INTELLIGENCE is the non-material **principle** 'back of them', which gives each it's 'knowing'.

This 'knowing' need not be self-awareness, or volition, rather it is the intelligence, which gives each its properties and PURPOSE.

- **Strings, quarks, particles, waves, and forces are tools—not the source.** They are the raw materials through which intelligence expresses itself.

- **Order in life is not a coincidence—it is the signature of intelligence at work.** ORDER is the first Law of the Universe. Every biological system, from a single cell to an ecosystem, exhibits organization, purpose, and adaptability far beyond what randomness could ever produce.
- **Physics alone is rudderless.** It describes mechanisms but cannot explain why they exist, why they are fine-tuned, or why they work together seamlessly to sustain life.

A ship without a rudder drifts aimlessly. **The forces and Laws of physics, RELIES ON INTELLIGENCE and without Absolute Intelligence, would do the same, Indeed could not exist.**

We do not see aimlessness—we see a universe of breathtaking precision, interconnection, and purpose. This is not a product of chance—it is the **active presence of intelligence shaping existence.**

Conclusion

If Absolute Intelligence is the omnipresent life that animates all things, then **matter is not an independent entity but a vessel through which Intelligence expresses itself.** The laws of physics, the forces of nature, and even the smallest particles are not isolated mechanisms; they are **guided expressions of Intelligence giving form, purpose, and order to existence.**

In **Lesson 6**, we will expand on this by examining how **life is not something that needs to be sustained—it is the sustaining principle itself.** We will explore how **Intelligence does not simply create matter but embodies itself within it,** demonstrating that the division between the material and the immaterial is an illusion. True understanding requires recognizing that life is not fragile or accidental—it is the eternal, omnipresent force shaping all things.

APPLIED META-PHYSICS

The Science of Be-Ing and Knowing

Animae nostrae alas habent

The Theory of Everything (ToE)

Lesson 6

LOVE AND LIGHT IN ALL AND THROUGH ALL!

"THE NEW WORLD COMES THROUGH US".

www.servadei.com

Lesson 6

ABSOLUTE INTELLIGENCE is OMNIPRESENT LIFE. Animation, embodies life, living creatures embody absolute intelligence.

Absolute Intelligence is not something that merely "sustains" life—it *is* Life itself, omnipresent and eternal. Life is not a product of physical processes; rather, physical processes are the means through which Life expresses and animates itself.

- **Life is not something to be "sustained"—it is the fundamental reality.** What we call "living beings" are simply **vessels through which Life takes form** in different ways.
- **Matter does not create Life—Life embodies itself in matter.** The physical world is an expression of **living intelligence** shaping itself into form.
- **Animation is the right term.** Absolute Intelligence **animates and expresses itself** through all things, from the smallest particles to galaxies and beyond.

This distinction is critical. Life is not something fragile that needs to be sustained—it is the **eternal, omnipresent essence** that **animates and manifests itself** in endless forms.

The Principle of ABSOLUTE INTELLIGENCE does not impart its Wisdom and Power to those who would misuse it. So, the MOTIVE of discovering the ToE plays a HUGE role in understanding it fully.

Motive is everything. Absolute Intelligence does not **recklessly dispense its wisdom and power** to those who seek it for selfish, destructive, or trivial reasons. Just as we do not hand

a child a fortune to waste on candy, the **deepest truths of existence** are not granted to those who would misuse them.

- **The pursuit of a Theory of Everything is not just an intellectual exercise—it is a moral and spiritual responsibility.** One's intentions shape what is revealed to them.
- **Wisdom requires maturity.** Absolute Intelligence does not withhold knowledge—it ensures that those who seek it are **aligned with its purpose** before they are entrusted with its power.
- **The universe is not random—it is intelligent and self-regulating.** Just as natural laws prevent chaos, the **principle of intelligence ensures that true understanding unfolds only in the right hands.**

Thus, those who approach the ToE with the motive of **domination, control, or personal gain** will **never grasp its fullness**—they will only receive fragmented, incomplete glimpses. But those who seek it with **humility, alignment, and the intention to serve Life** will find themselves **guided into deeper understanding.**

This is why **the heart must be in harmony with the mind**—for only through **purity of intent** can one truly receive the **fullness of Absolute Intelligence.**

Conclusion

If Absolute Intelligence is the omnipresent Life that animates all things, then understanding it requires more than intellectual pursuit—it demands **alignment with its purpose.** Knowledge is not withheld, but it is **only fully grasped by those who seek it with the right intent.** The deeper truths of existence are **not commodities to be exploited but responsibilities to be honored.**

In **Lesson 7**, we will **recap** the key insights from our exploration so far, reinforcing how Absolute Intelligence is not just the foundation of existence but the **guiding principle behind all life and consciousness.** This reflection will prepare us to delve even deeper into the unfolding of Intelligence, setting the stage for the next phase of our journey toward a **comprehensive Theory of Everything.**

APPLIED META-PHYSICS

The Science of Be-Ing and Knowing

Animae nostrae alas habent

The Theory of Everything (ToE)

Lesson 7

LOVE AND LIGHT IN ALL AND THROUGH ALL!

"THE NEW WORLD COMES THROUGH US".

www.servadei.com

Lesson 7: Recap & The Path Forward

In the first six lessons, we have established the foundation for a true **Theory of Everything**—one that recognizes **Absolute Intelligence** as the **omnipresent, eternal principle** that animates all existence.

Recap of Lessons 1–6

1. **Absolute Intelligence is the Foundation** – It is not an emergent property rather the **source** from which all things arise. It is not passive; it **actively expresses itself** in all that exists.
2. **Matter is a Structured Expression of Intelligence** – Physical reality is not fundamental; it is a **manifestation** of intelligence shaping itself into form.
3. **Laws of Physics are Intelligence in Action** – They are not random but the **orderly outflow** of Absolute Intelligence organizing existence.
4. **Consciousness is Not an Anomaly** – It is the direct experience of **intelligence within itself**, not a byproduct of matter.
5. **Life is Not Something Sustained—It Is the Sustaining Principle** – What we call “living beings” are merely forms through which **omnipresent Life expresses itself**.
6. **Motive Determines Access to Deeper Understanding** – Absolute Intelligence does not impart its wisdom and power arbitrarily. Those who seek knowledge for **selfish**

or destructive reasons will only receive **fragmented glimpses**. Those who seek it with **alignment and humility** will gain **deeper insight**.

Looking Forward: Lessons 8–13

Now that we have established the foundation, we will begin to answer deeper questions:

- How does **Absolute Intelligence express itself uniquely** in different beings?
- What is the relationship between **consciousness, free will, and intelligence**?
- If all reality is an **intelligent system**, how does it ensure order, balance, and evolution?
- How do **emotion, intuition, and psychic phenomena** fit into this framework?
- What is the **purpose of embodied intelligence**—and where is it leading?

In the next lessons, we will move beyond observation into **practical understanding**, showing how these principles **apply to both the cosmos and the individual**. True knowledge is not just **seen** but **lived**.

NOTE on Learning:

In any discipline, where one dedicates decades of their life in learning the nuances and deeper aspects of their discipline, they gradually grow separate from those who do not share the same discipline. When the two grades of consciousness meet, there's some disparity.

This is a natural process of life. The seed and the tree. They are not at 'loggerheads' with one another. The perspective of the neophyte, the novice, is limited, which the perspective of the initiate is expansive, universal.

Through a lack of exposure to the understanding and nuances of the initiate, the neophyte / novice may feel threatened, and so they react according to the pressure of the atmosphere they feel. This has, in the past created a schism between those seeking to shed light, and those who cling to the idea that knowledge and intellect is superior.

What the initiate seeks to convey, the neophyte/novice does not yet have the capacity to receive. In the past this has led to schisms, then the giving of names to each of the groups who are split, and then each group grows, and in their growth the invest time and effort into their own ways.

As each party does this, they develop their own traditions, and close off the others. This is where we are in the world today. Tens of thousands of groups, whose thinking is concretised and each is convinced of their own 'rightness' and of the 'others' 'wrongness.

The result is more insecurity, resulting in fear, and the fear grows justified by a self-perpetuating materialistic outlook which produces hatred, and anger, which is then acted on causing friction, separation, wars, suffering and death.

There is ONE way ALONE, which the hu-man family can overcome the insecurity, the division, the fear, the hatred, greed and lust for power and that is to reunite with the Shekinah Glory pulsating invisibly deep within each heart, awaiting recognition for each person to open the door and allow the King of Glory into their hearts.

Conclusion

The journey toward understanding Absolute Intelligence is not just about acquiring knowledge—it is about **living in alignment with it**. Those who have contemplated and embodied these principles for decades experience them as **self-evident truths**, while those encountering them for the first time may require time to fully integrate them. **True learning is not merely intellectual—it is the unfolding of Intelligence within.**

In **Lesson 8**, we will explore how Absolute Intelligence, animating humanity, **inspires the very search for the ToE itself**. We will examine how this Intelligence passes through the **prism of its own mind**, manifesting as different aspects of creation—each revealing a **reflection of our own nature**. As we move forward, the focus will shift from observation to direct experience, unlocking deeper levels of wisdom through conscious realization.

Let us continue.
