APPLIED META-PHYSICS, THE SCIENCE OF BE-ING AND KNOWING

Lesson: COMPOUND INTEREST

In an earlier lesson I stated that analogy is the “language of God”. This means that *everything we can see represents an idea, and God is speaking to us in ideas, and we tap into the idea and depending on how clear our minds are, we manifest the idea and or ‘in-vent’ the design or apparatus or methodology of each idea our minds have grasped.*

This is Faith in action.

God creates in the Spiritual, we form in the world of appearances by grasping with our minds the ideas, and then their in-formation influences our ac-

tions, and we act and build our world.

Everything we see is teaching us the language of God.

Walk down the street and see libraries (memories) shops (stores of energy) phones (communication between cells) television (faculty of imagination and envisioning), educational facilities (the process of life itself is one of education— edu-care, drawing forth and developing the inner world we all carry).

The very word ‘street’ originally meant “where people walk” as their walking created the path and the paths grew into ‘streets!’.

So, here is another analogy, as each person represents a cell of the body, and where the attention is directed, there the path is carved in consciousness.

That bottle of water we are drinking from, represents a tiny aspect of a cell, with its membrane encapsulating the energy and information until required.

Go through a supermarket, and you will see all sorts of foods, and each represents an idea, a chemical compound, which will affect us all in one way or another.

Climb a ladder structure to clean a window, or paint a wall and you're climbing an analogy or representation of our DNA, with its double helix...

Pick up your phone or a camera and take a photograph, and you are using an invention, which represents the eyes...

The vast majority of people live in cities. These are representative of ganglia of nerves, with their telephone and electri-

cal wires, plumbing and waste systems ALL analogies for what is happening within each of us to keep us alive, every minute of every day.

Life's processes are constantly ***striving to teach us our own nature.***

A great many people have grown blind to this, and when someone invents a method or machine, or piece of technology, they seek to own it...

They have lost sight of the fact that the idea was *gifted* to them *freely*, and carries with it the responsibility of expressing it for the benefit of the whole BODY of the hu-man family.

In banking, we have many forms of finances, each representative of a bio-chemical process in the body, and each teaching us that once we set a chemi-

cal process into motion, it is nigh impossible to stop.

So, this is why when people are emotionally reacting to many aspects of life, the formula repeats itself with the trigger, and so the person is trapped in habit and addiction.

With every aspect of life there is a process of growth... What we pay attention to grows in our own mental arena, our own perspective.

The more closely we focus on something... one thing, the less we can pay attention to others.

LIFE is teaching us how to round out our character and develop many aspects of our nature.

Been to the airport recently? An airport is analogous to the migration of food/value through

our body... a bit like our digestion system.

Every morsel of food we eat 'checks in' with the intelligence of the stomach, where we have the faculties of Judgement and Wisdom, closely integrated with the ganglia there, operating, as yet, at a subconscious level within each of us.

The 'check in' personnel look at our tickets (the value each morsel of food carries) and tells us which part of the body we are to go to.

This is beautifully mirrored in the airports and the international and local flight services taking people on 'their' business.

Every single atom of consumables will be identified and given a destination... *over 99% of what we eat will be passed out of the body*, if we are of a reasonable

level of health.

What we retain is microscopic minerals and vita-minerals (vitamins) and LIGHT.

These vitamins and minerals create a chemical reaction in the body, and the absorption of LIGHT produces heat, and everything melds together in the factory of consciousness, processed by the metabolism and the body is formed.

When we eat a meal, we are setting a bio-chemical process into motion that will change us, and with every meal and every drink and every thought we think, we are transforming the body, *into the image and likeness of the image we hold in our own minds of ourselves.*

What image are you holding in mind of yourself?

This IS what you are building.

Have you consulted the blueprint of your own Spiritual body with its high ideals?

These high ideals are those God has Chosen for you, for ME, for all of us.

“Christ in you, the hope of glory”.

When we live in alignment with our highest ideals, we are constantly adjusting our affairs by looking towards our Spiritual blueprint, consulting it, and then comparing it to the structure we have already built and then determining how to make the adjustments, so the body more closely matches the blueprint.

With every thought, which is in alignment with our highest ideals, we hold and repeat in mind, its like earning **compound interest** in the ‘bank’.

Those who have a savings account add to it, and the more they add, the more the accrued total accumulates *interest*.

This is mirrored in our body, as we eat and drink and **think**, and consult our Spiritual blueprint, we are accruing interest, Spiritual substance and altering our bio-chemistry and the highest intelligence within us is always guiding us as to what to eat, drink, think, **say and do**, in order to perfect our body temple, and demonstrate the process and evidence, so others can do likewise.

We also have 'current' account, and this is where we are using energy each day... Our body's health, our Living Temple teaches us what we need to do to change.

What to eat will be projected

onto the screen of the imagination, who to befriend, what work to do... Everything we need is provided **before we need it**. Our duty is to grasp the idea and seek to understand it fully and live by it.

When we interact with others, when we eat drink, act, play games, work, etc., we are setting chemical reactions into action.

We are constantly submerged in these invisible forces and processes, and the healthier we are and the more aware we are of them, the more we can ‘temper’ them and not become subject to them.

This is called “being in the world, yet not of it”, because we are not ‘drinking’ its poison, which is its materialistic values and standards.

The stronger we are, the more resistant to the Race Thought Atmosphere and its emotional impulses.

And we ALL need impulse control, especially when we are working to overcome triggers which set off bio-chemical reactions within us.

When we experience more LIGHT of the Spirit from our blueprint, we grow stronger and more 'even tempered', as the LIGHT tempers the forces we live in, so they do not control us causing us to behave in a way we would rather not.

Take a glass of lukewarm water and add a spoonful of baking powder and stir it up a bit...

The resulting reaction is an analogy for emotional reaction in the body... Now tell the reaction to 'stop'... it will *not*.

The intellect is powerless to stop a bio-chemical reaction once it has started. A New Element needs to be introduced to halt it.

This is *exactly* why so many people are caught up in addiction. Ad-diction (ad-dicere in Latin) means “to sentence” which means, we speak, and set certain bio-chemical reactions into action, and all the words of the intellect cannot stop it *until its run its course*.

When we treat people for addiction, we teach this principle of The Power of the Word-how to introduce the New Element which neutralises the proces.

Certain words set off or ‘trigger’ a bio-chemical reaction in the body, and certain Words totally dissolve the triggers, *when used beforehand, and other words can halt the process in*

its tracks..

EVERY Word we speak is sown into the omnipresent aethers of the Spirit and of our own minds, and each will bear its fruit.

Each will grow, and the more we focus on ReGenerating our thinking, our Garden of Mind, we dissolve the old thoughts which entrapped us, and caused ill health, dis-ease, poverty, unhappiness, dis-harmony, restlessness, etc.

We use the power of the Word to dissolve these as we become aware, and we use the power of the I AM to ReGenerate and reform our character.

RE FORM, to form it anew, according to our highest ideals.

What are your most secret desires?

Are they serving you?

Or is your mind plagued with degenerate seed ideas of the concepts seeded there as you were growing up by the ‘adults’ around you?

I say ‘adults’ because we are *children of God*, an ‘adult’ is one who does not or refuses to live by the Divine Law. An ‘adult’ can be understood as being an adulterer of the Divine Law.

In the process of ReGeneration:

*“One man sows, another reaps,
God supplies the increase”.*

The one who *sows* and the one who *reaps* is *each of us*. The one man who sows is the person we were yesterday. The one man who reaps is the person we become ‘tomorrow’.

God supplies the increase be-

cause that is the Law of Sowing and Reaping. God is Law.

Compound Interest is when we 'water' the thoughts in mind.

When we hold fast to the image of the idea, whether it is health, wealth, finances, friendships, etc. We are watering the idea, and it grows in our minds and *serves us*.

For example: When we learn to walk, it takes a year for that first step (give or take a month or two) and then we learn to walk.

It takes us five years to become quite good at it, then another five to learn how to run really fast and co-ordinate the body and then another five to become a great gymnast. IF we have the right instruction.

With focussed attention and specialisation this process has

been accelerated, where it is especially evident in international sports.

So now, as grown ups, when we get out of bed in the morning, the **thought-structure** in our minds and brains enabling us to walk is *already there*.

We send the energy along it, and perform the action. This is how we build thought-forms **for every activity in life**.

This is 'compound interest' and is the key to developing any characteristic.

Those who learn how to speak new languages and musical instruments later in life work harder than those who do so younger.

The reason is simple, when we are young, we do not have so many 'branches' of other activities on our 'tree of life' *vying for*

the same energy.

Another important analogy of God is YHVH, the tetragrammaton the four letters representing God / Yahweh / Jehovah... is an onomatopoeia for breathing.

So, oxygen can be likened to money. Oxygen creates and facilitates the right environment for a multitude of process in the body.

The more oxygen rich, the healthier we are... up to a point.

When we sustain a balance of vitamins, minerals, sunlight and exercise. Each of these compound within us, and build us into who we are.

Money does the same in the world, when used for its real purpose. Go look in the mirror, this is your Book of Life, and will change according to what you invest into it. Indeed, the human

body is a prime example of **compound interest** in action.

Let us invest each day to sow into consciousness the rich ideals which produce health, peace and JOY.

End.

Applied Meta-Physics is the oldest Science in existence. It is the study of who we are and why we are here.

It is sometimes called 'The Science of Making the Ideal Real', because it identifies in concrete terms the abstract workings of the mind, and teaches the steps every eternal idea passes through in transition from the plane of the eternal spiritual world, to become manifest on the earth plane.

The sacred writings we have inherited are meta-physical in nature. This means they have been written through the inspiration of the Paraclete using words, which have varied meanings, interpreted accordingly, depending on which level of consciousness the reader has achieved.

The *art* of Applied Meta-Physics is to 'conceal, to reveal'. The Wisdom the writers concealed protects it from those who would destroy the writings, *and therefore destroy themselves*, until a time when the human family matured and awakened and realised its need.

The scriptures are like an offer to an addict deep in the throes of ad-diction, rejecting what they really need most, and lashing out, because they have lost control of their own minds. In the height of the loss of control the addict attacks those seeking to help them and would destroy them.

The parables, analogies, codes and koans in the Helios Biblia have preserved these writings, as the power of the Word concealed within them has worked in the hu-man consciousness to do exactly that.

Applied Meta-Physics is the Key opening the way to comprehending their riches and applying the Wisdom revealed in one's life and proving the truth thereof.

There is a simple fact of life:

We are all created equal, in that we are all the offspring of God, and we form our lives by the thoughts, words, deeds we think, speak and do. The equality is that the Divine Law is no respecter of personalities.

We are all held responsible for everything we do, and our body either regenerates or degenerates according to the motives of our hearts. If we seek to rule others, we are using the life we have been given to express ourselves contrary to the Divine Law, and this is slow and definite suicide.

If we submit to the will of another, this too is slow suicide and contrary to the Divine Law.

The LAW IS!

It is the Doorway to Everlasting Life.

PEACE.
